## Development Manager | Full-Stack Engineer | Scaling Teams

San Mateo, CA  
zhusujun199495@gmail.com  
linkedin.com/in/sujunzhu

Full-stack engineer turned engineering manager at IXL Learning, currently managing two teams across Education.com, Takeoff by IXL, and adjacent product areas. Experienced in building analytics products at scale, driving cross-functional execution, mentoring engineers, shaping ownership, hiring, and supporting teams as product scope and responsibility grow.

### CORE STRENGTHS

|                    |                                                                                                                         |
|--------------------|-------------------------------------------------------------------------------------------------------------------------|
| <b>Leadership</b>  | Engineering management, team structure, ownership models, mentoring, hiring, interviews, stakeholder alignment          |
| <b>Execution</b>   | Cross-functional project delivery, product planning, production triage, documentation, process facilitation             |
| <b>Engineering</b> | Java, React, Redux, JavaScript, Node.js, Kafka, Postgres, Oracle, Cassandra, Redis, S3, Docker, Jenkins, Elastic/Kibana |

### EXPERIENCE

#### IXL Learning - San Mateo, CA Development Manager

Jan 2026 - Present

- Manage two teams across Education.com, Takeoff by IXL, and adjacent product areas, focusing on execution, alignment, team structure, and ownership as the organization evolves.
- Support engineers at different levels by clarifying priorities, creating manageable project paths, and helping teams take on broader product responsibility.
- Partner with product, design, QA, and engineering stakeholders to keep work coordinated across multiple product surfaces and newer initiatives.

#### IXL Learning - San Mateo, CA Engineering Project Lead

Jan 2023 - Dec 2025

- Worked closely with a Teacher Analytics team of about eight engineers to deliver key initiatives across engineering, product, design, and QA.
- Expanded from senior individual contributor into tech lead manager scope, with up to eight direct reports at peak, including an intern.
- Led 5+ large inter-team and intra-team projects from early planning through release and post-release follow-up.
- Mentored engineers, facilitated team routines and learning groups, contributed to process and documentation, and helped improve shared ownership across the team.

#### IXL Learning - San Mateo, CA Senior Software Engineer, Teacher Analytics

Jan 2021 - Dec 2022

- Built scalable teacher-facing analytics systems and reporting infrastructure for products serving over 14 million subscribers.
- Participated in 30+ medium and large projects, providing engineering judgment across backend APIs, frontend implementation, reporting workflows, and infrastructure decisions.
- Served on the analytics API committee, maintaining guidelines for team APIs used across related reporting teams.
- Built a reputation as a go-to engineer through code review, mentoring 3 junior engineers, resolving production P1 issues, and recurring error triage ownership.
- Conducted 220+ engineering interview rounds and onboarded 5+ engineering interviewers.

#### IXL Learning - San Mateo, CA Software Engineer, Product Team

Sep 2018 - Dec 2020

- Built teacher-level analytics reports end to end, from Java backend design and data hierarchy to React/Redux frontend implementation.
- Contributed to real-time reports for district and school leaders, addressing scale through historical caches, database query optimization, and threading improvements.
- Owned analytics printing infrastructure for 20+ reports by adapting a Node.js Headless Chrome microservice to process database-backed print jobs.
- Automated Salesforce CRM ticket creation for an internal feedback tool, improving workflow speed by about 80%.
- Reduced PDF font licensing cost by about 95% by proxying PDF population requests to a smaller set of app servers.

#### Lovefoodies Inc - San Francisco Bay Area Software Engineer Intern

Jan 2018 - Aug 2018

- Built and optimized web features for food content and appointment platform apponda.com, including appointment system work for a private clinic business.

### EDUCATION

|                                   |                                                                |
|-----------------------------------|----------------------------------------------------------------|
| University of Southern California | Master of Science, Computer Science                            |
|                                   | Bachelor of Science, Computer Engineering and Computer Science |
